1. The amendment filed on [1] canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP §821.03). The remaining claims are not readable on the elected invention because:
- (a) Applicant has revised the originally filed Invention Group VI, claims 37-39 and 43, to new invention in which differs from originally filed claims 37-39 and 43, and has canceled the rest of the non-elected inventions. Since the elected 'group invention IV' is a new invention and/or is restrictable from the originally filed Group IV invention because of inserting new limitations within the originally submitted claims (i.e., 'selected moveable output optical element' and 'each position encoder is operative to determine from the corresponding output control signal') and canceling some portions of the original claims thereby not infact electing the original Group Invention VI. Furthermore, the originally filed invention group IV claims are not found in the newly submitted claims 84-155 the applicant's newly submitted claims and therefore applicant's newly submitted claims found non-responsive. Since the above-mentioned amendment appears to be a bona fide attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
